PICTURE CAVE

Ancient Drawing Found Lately on this Island.

Reproduction for this Paper. - Difficult to Reach - A Headland Profile-The Kausi Locke.

A jolly party of sightseers left Wright's Villa a few Sundays ago to visit the "Picture Rock Cave," which was discovered the week previous by Mr. Adams and a party of three others.

Leaving Wright's in busses we drove through Kapiolani Park and over the White Road to the extension of eBretania street, which we followed out past Isenberg's and Monsarrat's and around the makai side of the great fish pond just beyond the latter place, and branching off to the right just beyoud the last clump of algaroba trees we made straight for the lowest point of land lying between.

Here we found the lower crater of Koko head, and alighting and dividing the lunch packages among us, began that portion of the trip which must be traveled on foot. Picking our way down the side of the crater we soon found ourselves upon Pele's ancient scene of action. A short walk brought leading to the beach.

in Indian sie we descended and at

the opening of the ravine onto the beach we tound "Peie's Bar," but as

little Peres. At any rate an we could not the deserted bar.

Excitement prevalled upon reaching the first biss hole a little further on, and here our cameras were first brought into use. This Blow Hole No. I is a small aperture at the waters edge, opening evidently into a larger recess under the rock and the rushing in of the surf so compression. in of the surf so compresses the air that the water is forced back under im-

mense pressure in a huge jet of spray. Pele's Candy Kitchen was our next scene of inspection and it was a won-der too, the strata, resembling a yellowish clay, was twisted and bent into all manner of shapes and looked more like a great heap of fresh molasses candy than anything else we could

in through narrow rifts in the rocks and out upon narrow ledges overhang ing the sea, sometimes threatened with a drenching from the surf and some times nearly taking an involuntary bath in consequence of the slipperines of the lava.

Soon, however, we are at our des quite an entrance at the base of the bappiness.

feet and the impression having been taken on paper direct from the rock and reduced by photographic process their correct outline is maintained.

The roof of this cave is of no less interest than the pictures, formed as suffered with ovar-it evidently was by a thin flow of lava, ian trouble," is Mrs. which before it had cooled was struck | Clark's own version by a shower of white rocks of an av-erage sixe of six inches diameter and not free one single erage sixe of six inches diameter and in appearance resembling limestone; these rocks penetrated the lava sufficiently to show through on the under side and give to the cave the appearance of having been set with jewels. Later flows and the washing down of the higher soil have built the bank quite high above the cave.

After regaling the inner man and

studying the hieroglyphics our band divided into small parties and explored

the coast for a mile or so beyond. The "Watchman of Oahu" is unique study of rock formation and for the benefit of the reader a cut is printed showing the distinct outlines of this naturally formed face in the cliff.

Next comes Blow Hole No. 2 and ex-cept that the surf is very strong and he tide high you can see but little of this ocean geyser.

At one point you come to an impas-sable cliff that projects out into the ocean and wonder what the chances are for further investigation. If, however, you follow the base of the cliff inland for a short distance you will observe a "Hole in the Ground" into which you must fall if you desire to get to the other side of the cliff, a small, low passage leads through and brings you out upon the narrowest of and I am thankful to Dr. Williams' Pink Pills for Pale People for the bleswhere your nerves for the moment are severely tested.

A beautiful sandy beach is found beyond the next ridge and some of the party indulged in a swim in one of the finest surfs to be found on Oahu. Others of the party looked among the coral for shells and sea weeds which abound along this shore.

Our return to the busses was over the same ground and as we talked over the events of the day all pronounced the trip one of the pleasantest and most interesting days of our stay upon these Islands. B.

The following is from an interesting Government has article by J. K. Farley in Thrum's 1898 Caroline islands.

us to the outer wall of the crater, and, elimbing to the top, we saw the ravine of Replica of Oahu Cave Pictures. "The California Fertilizer Works of Replica of Oahu Cave Pictures. Watchman" is a Prominent Landmark Near

erally covered with sand, is about 110 by 25 feet, and at the last exposure about sixty-seven pictures were vis-merely outlined, while in Oahu the figures are cut out fully.

This ledge differs from the pictured

rocks of Oahu in that the figures are ible.

Mr. Farley cites numerous legends and traditions, among which is the oun ueuron expeu plo ue jo memore; claims to have seen many pictures o In and out, up and down we went which there is no record, including over boulders and under hanging rocks strange canoes and unfamiliar animals. Mr. Farley thinks the Keoniloa beach figures could easily be removed.

A Woman's Burden.

From the Evening News, Detroit, Mich.

Soon, nowever, we are at our destination and everybody says "Why, where is the cave?" At first glance there appears to be simply a rift in the strata, which at this place runs at an angle of nearly forty-five degrees, but a closer inspection reveals that there is ping their vitality and clouding their that severally a contract of the very cont

cliff and entrance at the share of the strata brings the flat surface of the strata brings Michigan Avenue. Detroit, is a typical are buying in the most conservative way believing that values have not yet woman of today. A wife with such way believing that values have not yet erewith printed.

The area covered by these figures is ambition as only a loving wife can be settled to a level that would justify bout six and one-half feet by eleven have. But the toys of her life were them in carrying heavy stocks. With But the joys of her life were have. marred by the existence of disease.

Suffering as thousands of her sisters have suffered, she almost despaired of life and yet she was cured.

"For five years I suffered with ovarday from headache and intense twitching pains in my neck and shoulders. For months at a time I would be

confined to my bed. black I became blind. At times spots would appear before my eyes and I would become blind. My nerves were in such a state

that a step on the floor unsettled me. "Eminent doctors, skillful nurses, the best food and medicine all failed. Then I consented to an operation. That, too, failed and they said another was neces-sary. After the second I was worse than ever and the world was darker

than before. "It was then I heard of Dr. Williams Pink Pills for Pale People. I heard that they had cured cases like mine and I tried them.

"They cured me! They brought sunshine to my life and filled my cup with happiness. The headache is into gone; the twitching is gone; the nerv-Pink Pills for Pale People for the bles-

MADRID, Feb. 10.-The Spanish Government has decided not to sell the

General Market Notes Has Been Quietness-Arrivals-New York, World's Visible Supply.

Hawari receives scant mention in th Otis, McAllister & Co. coffee report at hand. There were received at San Francisco from the islands since the 7th of February, 2,080 packages of coffee, but sale is not noted. Otis, Me-Allister & Co. say of the market generany:

for this Season of the year and pendthe exception of Coffees grading Sc and under, which seem for the present at least to have reached a stable basis of prices, our quotations are largely nominal, the sales of better classes of College going at such irregular figures as to prevent more accurate description. Strictly fine washed Guatemalas still find buyers at about former rates -in fact the supply of these is not equal to the demand.

The New York market showed a slight improvement in futures toward the end of January, which has since been practically lost. Brazil Coffee on the spot there has scarcely fluctuated during the past month, with very dull business.

Business is dull, dealers purchasing only as requirements compel. Fancy styles and fine drinkers are in fair request, but the present stock (1500 bags) does not show such goods. The market is soft for grades below prime, and questions are therefore nominal.

These are figures on the world's visible supply:

February 1st, 1899..... 6,557,763 Against Janury 1st, 1898.... 6,600,763 Against February 1st, 1898... 6,031,474

CHAMBERLAIN'S COUGH REMEDY ALWAYS PROVES EFFECTUAL.

There are no better medicines on the market than Chamberlain's. We have used the Cough Remedy when all others failed, and in every instance it This is not an empty puff, paid for at so much a line, but is voluntarily given in good faith, in the hope that suffering humanity may try these remedies and, like the writer, be benefit-ed.—From the Gienville (W. Va.) Path-finder. For sale by Benson, Smith & Co., Ltd., wholesale agents for H. I., all druggists and dealers.

MANUFACTURERS OF PURE BONE FERTILIZERS AND PURE BONE MEAL.

.... DFALERS IN....

Fertilizer Materials

OF EVERY DESCRIPTION.

Have constantly on hand the following goods adapted to the Island trade: HIGH GRADE CANE MANURE, FERTILIZERS,

NITRATE OF SODA, SULPHATE OF AMMONIA. HIGH GRADE SULPHATE OF POTASH, FISH GUANO, WOOL DUST, ETC

Special Manures Manufactured to Order.

The manufest manufactured by the California Fertilizer Works are made entirely from clean bone treated with acid. Dry Blood and Flesh, Potash and Magnesia Salts.

No adulteration of any kind is used, and every ton is sold under a guaranteed analysis. One thousand tons are almost exactly alike, and for excellent mechanical condition and high analysis have no superior in the market.

The superiority of Pure Bone over any other Phosphatic Material for Fertilizer use is so well known that it needs no explanation.

The high and constantly increasing demand for the Fertilizers manufactured by the California Fastilizer Works is the best possible proof of their superior quality.

A Stock of these Fertilizers will be kept Constantly on Hand and for sale on the usual terms, by
